ATS-V

Some feelings in life are unequalled.
They are the ones that make you feel alive.
Those potent emotions stem from something unique.
They possess layered qualities that are distinctive and discerning.
Felt both inside and out.
Engineered and designed for the bold. The passionate. The stylish.
The ones who feel with a touch more attitude and a fistful of finesse.
If you want to feel the pure fun of driving and stand out doing it,
then this one is for you.

THE 2019 ATS COUPE

SPORTY LOOKS GREAT ON YOU

The 2019 Cadillac ATS Coupe is sporty with distinctive style. Accompanied by assertive horsepower, responsive handling and advanced technology, it's an exhilarating drive wrapped in a sophisticated design.

Rooted in performance, the ATS Coupe family was not only a world-class racing circuit winner, it was an absolute predator. You'll find this power echoed in the throttle. As soon as you press the pedal, a harmonic tone advances rapidly from the engine, signaling your departure. The exterior design is also reminiscent of racing; each wheel is pushed and positioned to the corners. Its wide yet athletic stance is planted with a stiff chassis and lightweight, balanced design. You might say the ATS put the "S" in Sport.

A more dynamic aerodynamic. The active aero grille shutters, underbody aero shield and integrated LED center brake lamp that doubles as a spoiler help the ATS Coupe elude the air for enhanced efficiency and control.

1000 times a second. Available Magnetic Ride Control reads the road up to 1000 times a second and automatically adjusts the suspension to the changing road surface. So you can handle a highly responsive vehicle, regardless of road conditions.

Lighting the way forward. High-Intensity Discharge (HID) headlamps feature available. Adaptive Forward Lighting that swivels as the vehicle turns, helping illuminate curves so you can see what lies ahead. And signature Light Blade LED taillamps showcase a dramatically sculpted rear profile to help you stand out on the road.

We have lift-off. The track-capable ATS-V harnesses a 3.6L 464-hp Twin Turbo V6 engine and unleashes 603 Nm of torque, letting you travel from 0 to 100 kmh in a lightning-fast 3.8 seconds.

Driving to look forward to. And to be remembered. As soon as you press down on the pedal, you'll feel a powerful engine that is matched by impressive handling. The incredibly responsive power plant is an available 3.6L V6 engine that delivers 335 hp and boasts force.

Available Paddle Shifters allow you to move effortlessly through the transmission's eight gears without a manual clutch, giving you control without taking your hands off the wheel.

Starting power is matched with Brembo® front-brake stopping power. Carved from lightweight aluminum alloy, these brakes offer a host of advantages, including great stopping power and wear resistance.

SPEED AUTOMATIC
TRANSMISSION

Above: ATS Premium Luxury in Radiant Silver Metallic. Shown with available equipment.

Style. Like yours. The Coupe's powerfully sculpted front and rear vertical lighting radiates performance, while the exterior profile is designed to slice through the air. The aerodynamic and sleek ATS Coupe side mirrors feature an integrated turn signal so they are both functional and stylish.

Along the side profile, you'll also find a wide-track statement, as each wheel is pushed to the very farthest distance of the four corners. When you approach the ATS and unlock the doors, available Illuminating Door Handles are a distinctive style cue that invite you forward into the dark.

The 18" forged aluminum wheels¹ deliver striking looks, as well as excellent strength and ride comfort. Accentuating and defining the rear stance, while begging to growl, are two polished and sculpted exhaust tips.

¹ Lower-profile tires wear faster. Wheel and tire damage may occur on rough or damaged roads or from surfaces, curbs, debris or obstacles. This damage is not covered by the GM New-Vehicle Limited Warranty. For more important tire and wheel information, go to my.cadillac.com/learnabout/tires, or see your dealer.

Tech that makes your experience everything you want.

Simply connect your iPhone® with Apple CarPlay™³ and access your contacts, Apple Music™ and other information from your iPhone® with a touch of the screen. You can also ask Siri,® so features are easily accessible to you or your front-seat passenger.

In the driver's seat, you can project the information that matters most to you with the available Head-Up Display (HUD). Speed, audio, navigation and other information are projected onto the windshield, so you can keep your hands on the wheel and your eyes on the road.

The Cadillac user experience¹ puts a suite of information and entertainment offerings, including climate, audio, setting controls and available 3D GPS Navigation, at your command.

Even your key fob is intelligent. Adaptive Remote Start uses the key fob to start your engine from up to 91 meters away and will automatically adjust the vehicle's interior temperature depending on the outside temperature, even warming your available heated steering wheel when needed.

1. Cadillac user experience functionality varies by model. Full functionality requires compatible Bluetooth® and smartphone. Some devices require USB connectivity.

STYLISH INSIDE, TOO

The ATS interior is stunning and streamlined. Surround yourself with a story of modern elegance and craftsmanship available in exotic woods, carbon fiber and supple Semi-Aniline leather.

When it comes to its sophisticated interior, you have many options. Select from a hand-finished instrument panel, door trim, armrest and seats, as well as a hand-sewn steering wheel.

Available performance front seats are crafted from premium materials and offer up to 18-way adjustments for extra support so you can drive in comfort. Sport alloy pedals place the finishing touch.

SPEAKER BOSE
SOUND SYSTEM

SURROUNDED BY AVAILABLE SAFETY INNOVATIONS

SET YOUR SPACE

Available Adaptive Cruise Control-Advanced employs both radar and camera sensors to maintain a set selected following gap between you and the detected vehicle ahead.

TRULY FORWARD THINKING

Forward Collision Alert monitors traffic ahead, alerting you if a potential collision is imminent, while the available Following Distance Indicator shows the following time to the detected vehicle ahead (in seconds) in the Driver Information Center (DIC).

AN INTELLIGENT WIPER

Rainsense Wipers automatically engage when rain is detected, adjusting their speed to the rain's intensity. Whenever the wipers are activated, Auto-Dry brakes automatically position the brake pads closer to the rotors to sweep away moisture and improve performance.

STRONG ENOUGH TO CRUMPLE

The ultra-high-strength steel safety cage features strategically placed crumple zones that help absorb and manage crash energy. The safety cage is also equipped with eight standard airbags¹, including knee airbags for the driver and front passenger.

FIRMLY REASSURING

During emergency braking or sudden maneuvers, available Automatic Seat Belt Tightening activates. When conditions revert to normal, the seat belts ease automatically.

TRAVEL THE STRAIGHT AND SMART

Using a camera sensor to monitor lane boundaries, Lane Keep Assist can gently turn the steering wheel if the system anticipates the vehicle is leaving the lane unintentionally or without using your turn signal. Working in conjunction with the Safety Alert Seat, Lane Departure Warning shows a visual alert in the cluster and sends a warning pulse through the seat cushion when your vehicle crosses the detected lane marking.

AN ATTENTION-GRABBER

Lane Change Alert surveys the area well beyond the side blind zone and illuminates the side-mirror warning icon to alert you if a vehicle is rapidly approaching. Side Blind Zone Alert monitors your blind zones, so if a moving vehicle is in the adjacent lane, it also illuminates the side-mirror icon. In both features, if you've activated your turn signal, the icon on the side mirror flashes to alert you.

GRABS YOUR ATTENTION. SUBTLY.

Cadillac's patented Safety Alert Seat sends a discreet pulse to the left, right or both sides of the driver's seat, indicating the direction of the threat—left, right, front or rear.

BE ALERTED EVEN IN REVERSE

When backing out of a parking space, Rear Cross Traffic Alert can warn you of oncoming traffic to either side of your vehicle and provides an audible warning or a pulse to the Safety Alert Seat.

GAIN PRECIOUS TIME

Up to certain speeds, available Forward and Reverse Automatic Braking can sense imminent forward and reverse collisions and automatically engage the brakes, if you have not already done so, helping to reduce the severity of the collision. The system may even help avoid a collision at very low speeds.

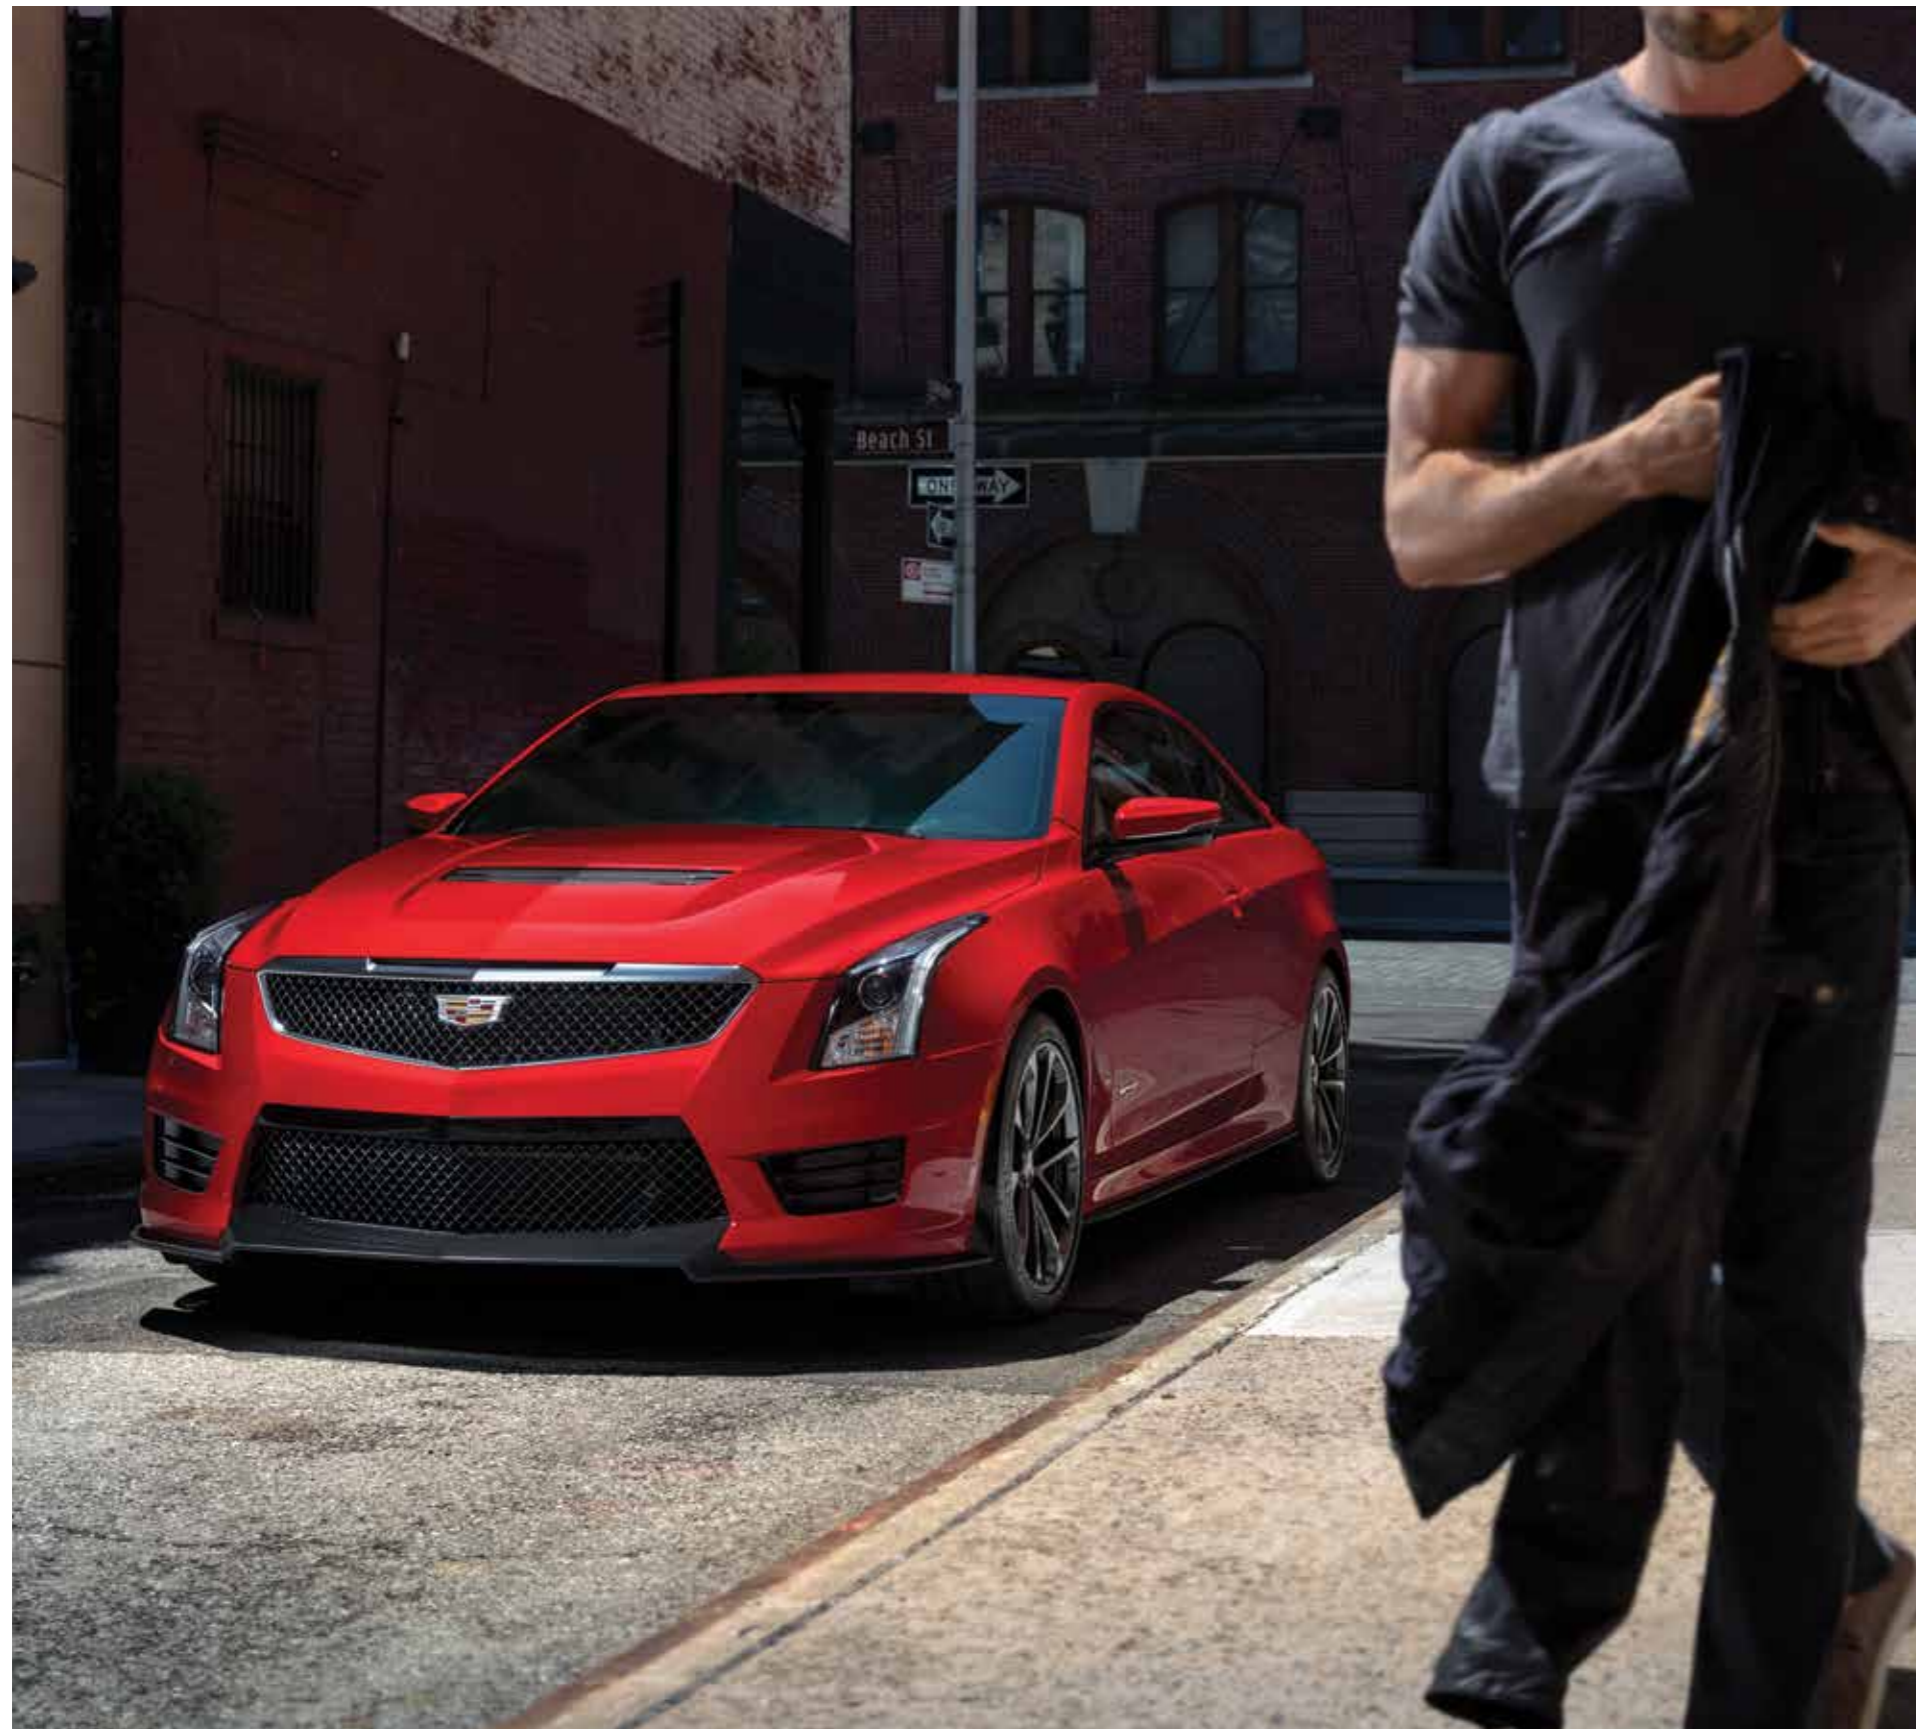

Safety or driver-assistance features are not substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle Owner's Manual for important feature limitations and information.

¹ A NOTE ON CHILD SAFETY: Always use seat belts and the correct child restraint for your child's age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See your vehicle Owner's Manual and child safety seat instructions for more safety information.

OUTRUN ANY EGO

The ATS-V is the lightest, most nimble V-Series. It's track-capable, and just as fun on the road. Combined with high-strength, lightweight titanium connecting rods, low-inertia titanium-aluminide turbine wheels and a patented low-volume, charge-air cooler, you travel from 0 to 100 kmh in a lightning-fast 3.8 seconds.

AGILE AND POWERFUL MAKE AN INSPIRING COMBINATION

The ATS-V 6-speed manual transmission is standard and equipped with an incredibly satisfying short-throw shifter and dual-disc clutch. Combined with features such as No-Lift Shift, Launch Control and Active Rev Matching, it is perfect for harnessing the V-Series' power.

There's also an available 8-speed automatic transmission that features Performance Algorithm Shifting. Automatically activated by intense g-forces, this technology seamlessly selects the best gear for quicker shifts and faster lap times. For even more control, Paddle Shifters let you tap through the gears for blazing acceleration and deceleration.

Front and rear Brembo brakes are standard V-Series equipment. Front mono-block brake calipers are carved from a single block of lightweight aluminum alloy for a firm pedal feel and unmatched confidence. Front disc brakes feature a two-piece rotor design for exceptional heat resistance, performance and durability. In addition, a Ferritic Nitro-Carburizing process greatly reduces corrosion on the rotors, helping maintain stopping power and prolonging brake life.

The V-Series' stunning stance also plays a crucial role in performance. Its aerodynamically designed front splitter and front hood vent steer air around and over the vehicle to reduce lift. The iconic mesh grille is engineered for maximum airflow to the engine. A dramatic rear spoiler creates downward force to help keep the V-Series' tires planted firmly on the roadway.

464 hp

3.6L TWIN TURBO V6

3.8

SECONDS, 0-100 KM/H

V-tuned tech. The V-Series is equipped with a carbon-fiber hood. The Carbon Fiber Package employs this lightweight yet incredibly strong material in the symmetrical design of a front splitter, hood vent and rear diffuser.

Manufactured in a high-security factory, V-Series Michelin® Pilot® Super Sport summer-only tires¹ feature a unique tri-compound design. The outer shoulder is particularly resistant to the wear associated with aggressive cornering. The tread's center ribs are optimized for steering and handling, and the inner shoulder is designed to slice through water, providing grip on the road. These tires also feature R-compound—the “R” stands for racing. Rarely seen on street-vehicle tires, this technology delivers an exhilarating amount of grip.

During aggressive cornering—or on curvaceous on/off ramps—the electronic Limited-Slip Differential (eLSD) automatically directs power to the rear wheel with the most traction for great control and fast exit speeds. With No-Lift Shift, you do not have to let off the gas when switching gears. This keeps the turbochargers spooling, so there's a faster return to full power when you re-engage a gear. For a boost of adrenaline, there's Launch Control. It monitors ambient conditions and engine parameters, then adjusts the engine and transmission control accordingly to work together for maximum, full-throttle acceleration off the line, resulting in more consistent 0-100 times.

¹ Do not use summer-only tires in winter conditions, as it would adversely affect vehicle safety, performance and durability. Use only GM-approved tire and wheel combinations. Unapproved combinations may change the vehicle's performance characteristics. Lower-profile tires wear faster. Wheel and tire damage may occur on rough or damaged roads or from surfaces, curbs, debris or obstacles. This damage is not covered by the GM New-Vehicle Limited Warranty. For important tire and wheel information, go to my.cadillac.com/learnabout/tires, or see your dealer.

Facing page, left: Tri-compound tires. Right: A glimpse of carbon fiber. This page, above: The ATS-V in Wave Metallic. Shown with available equipment. Below: The “V” badge.

When you begin to take your ATS-V to the track, you'll have advanced technology to help you review your run and become a better driver. The available Performance Data Recorder captures your track driving—recording video, audio and performance data in real time that can be viewed on the Cadillac user experience screen or saved on an SD card to watch later. The system's four overlays—Sport, Track, Performance or Tour—help analyze your skills.

The ATS-V also offers competition-spec traction and stability controls. Performance Traction Management (PTM) integrates traction and engine control systems for improved and consistent cornering. Enter Track Mode and choose from five driver selectable levels of control: Wet, Dry, Sport 1, Sport 2 or Race.

Perfect execution is the only acceptable standard. At first thought, you might not consider a track-capable performer to also have the finest amenities. But that's what separates the ATS-V from the pack. You'll find craftsmanship, comfort and an array of technologies applied with precise and exquisite vision every time you step inside.

The tailored interior of the ATS-V is refinement pushed tastefully further. Leather appointments and trim options offer timeless style, along with subtle racing aesthetics. For instance, V carbon-fiber veneers are engineered for beauty and designed with a mirror-matched pattern to accentuate an advanced cockpit.

When it comes to seating, the ATS-V takes a confident place on the podium. Supple, strong and striking, the Semi-Aniline leather seating surfaces and steering wheel available in the V-Series are created using a process that retains the natural beauty of the materials, while enhancing their strength and softness.

Synonymous with racing, available RECARO® front seats feature a handcrafted shape that cradles your body during cornering. Along with slip-resistant sueded microfiber panels and adjustable bolsters, the seat design helps take the work out of staying in place during aggressive maneuvers. Their function is matched by extraordinary comfort. Available 18-way front Sport Seats are leather-trimmed with sueded microfiber inserts.

¹ Vehicles equipped with these linings will experience faster accumulation of brake dust on wheel surfaces and may produce more noise than with standard linings. ² Do not use summer-only tires in winter conditions, as it would adversely affect vehicle safety, performance and durability. Use only GM-approved tire and wheel combinations. Unapproved combinations may change the vehicle's performance characteristics. Lower-profile tires wear faster. Wheel and tire damage may occur on rough or damaged roads or from surfaces, curbs, debris or obstacles. This damage is not covered by the GM New-Vehicle Limited Warranty. For important tire and wheel information, go to my.cadillac.com/learnabout/tires, or see your dealer. ³ Go to my.cadillac.com/learn to find out which phones are compatible with the vehicle. ⁴ Cadillac user experience functionality varies by model. Full functionality requires compatible Bluetooth and smartphone. Some devices require USB connectivity. ⁵ Read the vehicle Owner's Manual for important feature limitations and information. ⁶ The system wirelessly charges one PMA- or Qi-compatible mobile device. Some phones have built-in wireless charging technology and others require a special adapter/back cover. To check for phone or other device compatibility, see my.cadillac.com/learn or consult your carrier. ⁷ A NOTE ON CHILD SAFETY: Always use seat belts and the correct child restraint for your child's age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See your vehicle Owner's Manual and child safety seat instructions for more safety information.

OWNER BENEFITS

Our owners deserve it all. That's why 2019 vehicles are backed by a comprehensive suite of owner benefits. To learn more, visit cadillac.com/ownership/benefits.

AN IMPORTANT NOTE ABOUT ALTERATIONS AND WARRANTIES

Installations or alterations to the original equipment vehicle (or chassis) as distributed by General Motors are not covered by the General Motors New-Vehicle Limited Warranty. The special body company, assembler, equipment installer or upfitter is solely responsible for warranties on the body or equipment and any alterations (or any effect of the alterations) to any of the parts, components, systems or assemblies installed by GM. General Motors is not responsible for the safety or quality of design, features, materials or workmanship of any alterations by such employers.

ENGINES

Cadillac products are equipped with engines produced by GM Powertrain or other suppliers to GM worldwide. The engines in Cadillac products may also be used in other GM makes and models.

ASSEMBLY

Cadillac vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Cadillac vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

A NOTE ON CHILD SAFETY

Always use seat belts and the correct child restraint for your child's age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See the Owner's Manual and the child safety seat instructions for more safety information.

TRAILERING AND OFF-ROAD DRIVING INFORMATION

Please go to cadillac.com and carefully review the vehicle Owner's Manual for important safety information about trailering or of f-road driving in your vehicle.

IMPORTANT WORDS ABOUT THIS CATALOG

We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this catalog and other printed materials provided at the dealership or

affixed to vehicles are approximations based on design and engineering drawings, prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing, please check with your Cadillac dealer for complete details. Cadillac reserves the right to lengthen or shorten the model year for any product for any reason or to start and end model years at different times. Certain vehicle features may lose their usefulness over time due to obsolescence from technological changes. Unless otherwise noted, all claims based on GM Compact-Car Coupe segment and latest available competitive information. Excludes other GM vehicles.

FLEET ORDERS

Some standard content may be deleted on fleet orders. See dealer for details.

18" AFTER MIDNIGHT DARK FINISH FORGED ALLOY

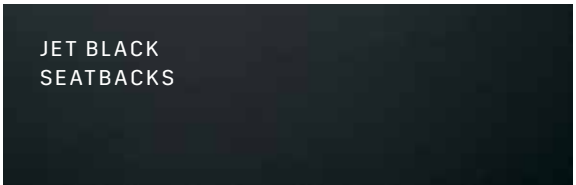

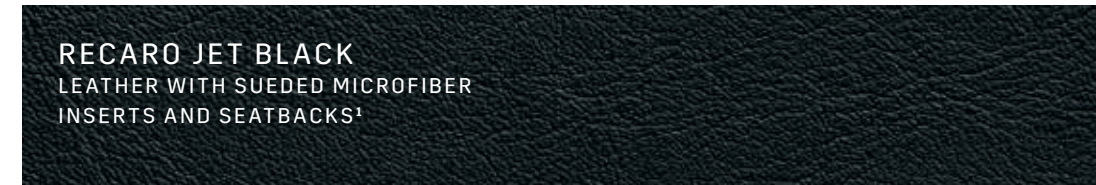

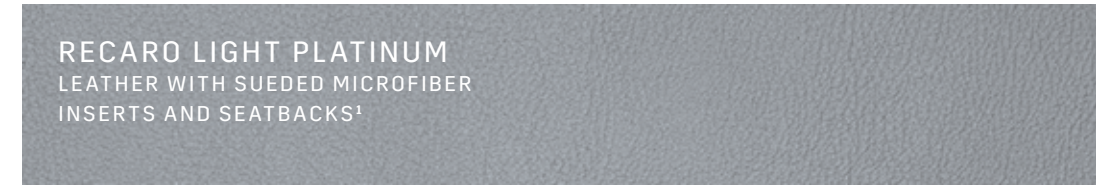

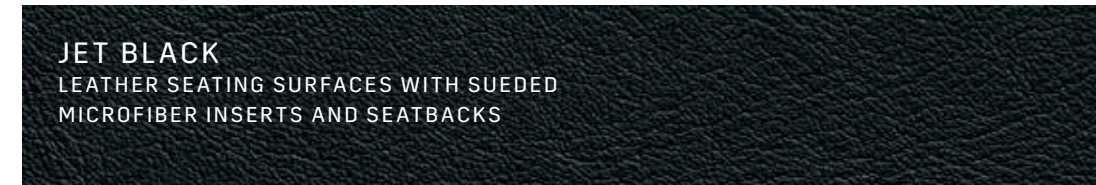

Available on ATS-V
 Size: 18" x 9" front, 18" x 9.5" rear with P255/35ZR18 front and P275/35ZR18 rear performance, summer-only.^{1,2} tires

¹ Lower-profile tires wear faster. Wheel and tire damage may occur on rough or damaged roads or from surfaces, curbs, debris or obstacles. This damage is not covered by the GM New-Vehicle Limited Warranty. For more important tire and wheel information, go to my.cadillac.com/learnabout/tires, or see your dealer. ² Do not use summer-only tires in winter conditions, as it would adversely affect vehicle safety, performance and durability. Use only GM-approved tire and wheel combinations. Unapproved combinations may change the vehicle's performance characteristics. For important tire and wheel information, go to my.cadillac.com/learnabout/tires, or see your dealer.
