

CTS

CTS
CTS-V

Most things become better with the benefit of experience.

We see how something so simple can have a massive impact on our lives.

And how these simple items are the product of a complex system.

Behind the scenes, the countless hours of performance engineering.

The timeless craftsmanship.

The infinite algorithms to create seamless technology.

When we choose to become more selective, we realize that we're getting

exactly what we need, when we need it.

That compromise isn't necessary and you can settle for everything.

THE 2019 CTS

WHEN EFFORT IS PROOF OF SUCCESS

The 2019 Cadillac CTS is designed to adhere to all your expectations. From a powerful collection of engines to an advanced cockpit that is encased by a vision of modern steel craftsmanship, the 2019 CTS is nothing short of everything you demand, all packaged in an exhilarating drive.

The CTS is rooted in performance. From its proven achievements on the famed Nürburgring to the propelling **V-Sport** model with remarkable horsepower to the racetrack-capable **V-Series**, excitement and a commanding drive are inevitable.

Well-appointed cabin, meet cockpit. The CTS is equipped with advanced technologies that deliver one powerful promise—masterful services and convenience. From the satisfying feel of the controls to seamless digital interfaces, all meet your needs with the greatest elegance and efficiency.

In just 4.4 seconds, the CTS V-Sport reveals itself. That's how long it takes the V-Sport Sedan to propel from 0 to 100 kmh with its Twin Turbo V6 engine with best-in-class 420 hp.

1000 times a second. Available Magnetic Ride Control reads the road up to 1000 times a second and automatically adjusts the suspension to different road surface conditions. The result is a highly responsive drive, regardless of road conditions.

The most powerful Cadillac ever built. With 640 hp and lightning-fast reflexes, the CTS-V is a rare automobile. You can test your limits on the track, then while on the street, make every drive infinitely comfortable and memorable.

420 hp

AVAILABLE 3.6L
V6 TWIN TURBO
V-SPORT ENGINE

8

SPEED AUTOMATIC
TRANSMISSION

Tested on the famed Nürburgring track, the CTS is serious about thrilling performance. Choose from remarkably powerful and efficient engines. The standard 8.84 L/100km Turbo 4-cylinder delivers a responsively potent 268 hp and an EPA-estimated 30 highway mpg.¹ The second option is the available 3.6L V6 that powerfully transfers 335 hp. Or for truly exhilarating performance, the available best-in-class 3.6L V6 Twin Turbo V-Sport delivers a pulse-racing 420 hp and 583 Nm of torque. All engines are paired with an intelligent 8-speed automatic transmission for reactive shifting.

Starting power is matched with Brembo® front-brake stopping power. Carved from lightweight aluminum alloy, these brakes bring a host of advantages, including excellent driving feel and wear resistance.

Cadillac performance innovations include available Magnetic Ride Control. It automatically adjusts the suspension to road conditions. The system reads the road up to 1000 times a second, tuning the suspension for a highly responsive, smooth drive in otherwise rocky scenarios. For additional control, available All-Wheel Drive with Active Torque Technology maximizes stability and handling, helping to deliver impeccable control in less-than-perfect driving conditions.

1. EPA-estimated mpg for 2.0L Turbo I-4 engine with 8-speed transmission: 10.69 L/100km (RWD); 8.11 L/100km (AWD).

Top left: 3.6L V6 Twin Turbo V-Sport engine. Above: Radiant Silver Metallic paint. Vehicle shown with available equipment.

Modern design. One look at the CTS and the powerful lines, curves and planes of the inlaid hood pop immediately into focus. With aerodynamic form, Cadillac signature lamps and advanced metalwork, you'll see how the CTS can move you even when it is standing still.

As striking as they are intelligent, hundreds of crystalline LED lights accentuate the exterior design. Standard High-Intensity Discharge (HID) headlamps feature Adaptive Forward Lighting. This technology automatically turns the headlamps according to your steering wheel position and provides you with optimal road illumination.

Travel alongside the profile of the CTS and impressive style is met with excellent visibility, while available Illuminating Door Handles deliver both. The final touch of the exterior boasts an integrated rear spoiler, featuring a 48-LED center brake lamp to help manage airflow and leave a lasting impression.

EXTERIOR CTS
COLOR CHOICES

Facing page: Crystalline LED lights. This page, top: Striking modern design; vehicle shown with available equipment. Bottom left: Radiant Silver Metallic paint. Bottom right: Dual exhaust.

(A) ENHANCED VIEW WITH STREAMING VIDEO DIGITAL MIRROR

(B) TRADITIONAL VIEW WITH REARVIEW MIRROR

Technological prowess. With just a touch, the available Rear Camera Mirror¹ streams video to the rearview mirror. This view (A) offers a wider, less-obstructed view than an ordinary rearview mirror. And a simple toggle instantly reverts to a traditional rearview mirror (B).

In the driver's seat, you can project the information that matters most to you with the available Head-Up Display (HUD). Speed, audio, navigation and other information are projected onto the front windshield, so you can keep your eyes on the road. A different display option is the available V-Sport gauge cluster. You can customize your view to emphasize your tachometer, kmh or other information in three reconfigurable themes.

The Cadillac user experience² puts a suite of information and entertainment offerings, including climate, audio, settings control and available 3-D GPS navigation,³ at your command.

And just as convenient, compatible devices can be powered with the Wireless Charging feature.⁴

1. Read the vehicle Owner's Manual for important feature limitations and information. 2. Functionality varies by model. Full functionality requires compatible Bluetooth® and smartphone, and USB connectivity for some devices. 3. The system wirelessly charges one PMA- or Qi-compatible mobile device. Some phones have built-in wireless charging technology and others require an adapter/back cover. To check for phone or other device compatibility, see my.cadillac.com/learn or consult your carrier.

Even your key fob is intelligent. Use it and Adaptive Remote Start will engage the engine from up to 91 meters away. It can also sense outside temperature to activate the appropriate cabin climate control, as well as heat your steering wheel, if equipped, when needed. Phone Integration with Apple CarPlay™¹ compatibility allows you to access your contacts, Apple Music™ and other information from your iPhone® with a touch of the screen.

Apple CarPlay™¹ also allows you to access Siri®, so features are easily accessible to you or your front-seat passenger. Phone Integration also offers Android Auto™² compatibility.

¹. Vehicle user interface is a product of Apple® and its terms and privacy statements apply. Requires compatible iPhone® and data plan rates apply. Apple CarPlay is a trademark of Apple, Inc. Siri, iPhone and iTunes are trademarks of Apple, Inc., registered in the U.S. and other countries. ². Vehicle user interface is a product of Google™ and its terms and privacy statements apply. Requires the Android Auto app on Google Play and an Android-compatible smartphone running Android 5.0 Lollipop or higher. Data plan rates apply. Android Auto is a trademark of Google LLC.

Interior luxuries await. The CTS will surprise and delight you with a large, comfortable cabin, yet maintain a compact, sporty feeling for pure exhilaration. When designing your cockpit, select from striking materials, such as real wood trim and available Semi-Aniline leather seating surfaces. Every choice is curated to work together beautifully, so no matter which you choose, the cabin will be a stunning expression of your personal style. Comfort is king with available Tri-Zone Climate Control. The driver and front and rear passengers are able to adjust the temperatures to their individual liking.

Up front, preferred seating comforts occupants with available 20-way front performance seats with power-adjustable seatback bolsters and manual thigh support. And while you're behind the wheel, an available, customizable 12.3" diagonal LCD gauge cluster allows you to choose how to display vehicle data, entertainment, communications and navigation information in full color.

12.3"

AVAILABLE
RECONFIGURABLE
GAUGE CLUSTER

SURROUNDED BY AVAILABLE SAFETY INNOVATIONS

SET YOUR SPACE

Available Adaptive Cruise Control-Advanced employs both radar and cameras to maintain a set selected distance between you and the detected vehicle ahead while you steer.

TRULY FORWARD THINKING

Available Forward Collision Alert monitors traffic ahead, alerting you if a potential front-end collision is imminent, while the available Following Distance Indicator shows the following time to the detected vehicle ahead (in seconds) in the Driver Information Center (DIC).

WINDSHIELD WIPERS AND BRAKES WORK TOGETHER

Available Rainsense Wipers automatically engage when rain is detected, adjusting their speed to the rain's intensity. Whenever wipers are activated, Auto-Dry brakes automatically position the brake pads closer to the rotors to sweep away moisture and improve performance.

STRONG ENOUGH TO CRUMPLE

The ultra-high-strength steel safety cage features strategically placed crumple zones that help absorb and manage crash energy. The safety cage is also equipped with 10 standard airbags,¹ including knee airbags for the driver and front passenger and side-impact airbags for front and rear outboard passengers.

FIRMLY REASSURING

During emergency braking or sudden maneuvers, available Automatic Seat Belt Tightening activates. When conditions revert to normal, the seat belts ease automatically.

TRAVEL THE STRAIGHT AND SMART

Using a camera sensor to monitor lane boundaries, available Lane Keep Assist can gently turn the steering wheel if the system anticipates the vehicle is leaving the lane unintentionally or without using your turn signal. Working in conjunction with the available Safety Alert Seat, available Lane Departure Warning shows a visual alert in the cluster and sends a warning pulse through the seat cushion when your vehicle crosses the detected lane marking.

AN ATTENTION-GRABBER

Available Lane Change Alert surveys the area well beyond the side blind zone and illuminates the side-mirror warning icon to alert you if a moving vehicle is rapidly approaching. Available Side Blind Zone Alert monitors your blind zones, so if a moving vehicle is in the adjacent lane, it also illuminates the side-mirror icon. In both features, if you've activated your turn signal, the icon on the side mirror flashes to alert you.

GRABS YOUR ATTENTION. SUBTLY.

Cadillac's available patented Safety Alert Seat sends a discreet pulse to the left, right or both sides of the driver's seat, indicating the direction of the threat — left, right, front or rear.

BE ALERTED EVEN IN REVERSE

When backing out of a parking space, available Rear Cross Traffic Alert warns of oncoming traffic to either side of your vehicle and provides an audible warning or a pulse to the Safety Alert Seat.

GAIN PRECIOUS TIME

Up to certain speeds, available Forward and Reverse Automatic Braking can sense imminent forward and reverse collisions and automatically engage the brakes, helping to reduce crash impacts.

Safety or driver-assistance features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Visibility, weather and road conditions may affect feature performance. Read the vehicle Owner's Manual for more important feature limitations and information.

MAKE EVERY DAY A TRACK DAY

As formidable on the track as it is convenient on the road,
the CTS-V is the leader of the V-Series family.
Designed and engineered with many goals, but one sole
purpose: ultra-high performance. Take technologically
advanced driving and maximum exhilaration, then finish
it with sophisticated style and deluxe amenities.

THE CTS-V WILL LAUNCH YOU FORWARD.

PERFORMANCE RACES THROUGH OUR BLOODLINE

Cadillac has a proven history in motorsports—from winning year after year in the Pirelli World Challenge Series to becoming a dominating manufacturer in the IMSA WeatherTech SportsCar Championship with its newest racecar, the DPi-V.R prototype. In 2017, the Cadillac DPi-V.R won five IMSA championship titles. This type of commitment to performance and excellence is found within Cadillac Racing and is obtainable with the Cadillac V-Series.

The skill, resourcefulness and pure grit that go into creating a world-class racing team are transferred to the heart and soul of each and every track-capable Cadillac CTS-V. Whether it's innovative Cadillac technology, such as the Performance Traction Management system, its striking wheels and exterior design cues or its powerful engine and functional aerodynamics, the CTS-V is a fitting cousin to the Cadillac DPi-V.R.

Transport yourself. The CTS-V 6.2L supercharged V8 develops 640 hp and 854 Nm @ 3600 rpm, launching you from 0 to 100 in 3.7 seconds, with a racetrack top speed of 322 kmh. A compact, efficient 1.7L, four-lobe Eaton® supercharger, with specially engineered rotors, generates boost early in the rpm band for a faster response. And Direct Injection, Continuously Variable Valve Timing technology and Active Fuel Management make everyday driving as efficient as it is exhilarating.

The sport automatic transmission features Performance Algorithm Shifting. Automatically activated by spirited driving, this technology seamlessly selects the best gear for each corner, whether you're seeking fast lap times on the track or enjoying your favorite canyon road. For even more control, Magnesium Paddle Shifters let you tap through the gears.

Massive front and rear Brembo brakes are standard V-Series equipment. Front mono-block brake calipers are carved from a single block of lightweight aluminum alloy—for firm pedal feel and unmatched confidence. Front brake discs feature a two-piece rotor design for excellent heat resistance, performance and durability. In addition, a Ferritic Nitro-Carburizing process greatly reduces corrosion on the rotors, helping maintain appearance and prolong brake life.

KMH TOP TRACK SPEED

Top left: CTS-V shown in Crystal White Tricoat. Above: Standard Brembo brakes.

When you analyze the formidable CTS-V frame, you'll uncover a stiff, lightweight structure that allows the V-Series to be track-capable from the factory. The V-Series boasts a multilink MacPherson strut independent front suspension, focused on delivering a quick response and lateral control. A five-link independent rear suspension achieves all-out track performance while maintaining everyday comfort.

The V-Series' stunning stance also plays a crucial role in performance. Its aerodynamically designed front splitter and front hood vent steer air around and over the car to reduce lift. The iconic V-Performance mesh grille is cleverly engineered to provide maximum airflow to the engine, while reducing wind resistance. A dramatic rear spoiler creates aerodynamic balance to keep the V-Series' tires planted.

The V-Series is equipped with a carbon-fiber hood — standard. An available Carbon Fiber Package employs this lightweight yet incredibly strong material in the symmetrical design of a deeper front splitter, hood vent louvers, rear aero diffuser and taller rear spoiler.

V-tuned tech. If you take your CTS-V to the track, you'll have advanced technology to review your run and help you become a better driver. The available Performance Data Recorder captures your track driving — recording video, audio and performance data in real time that can be viewed on the Cadillac user experience¹ screen or saved on an SD card to watch later. The system's four overlays — Sport, Track, Performance or Tour — help analyze your skills.

For a more detailed analysis, the Performance Data Recorder can be used in conjunction with the available Cosworth Toolbox.

Used by professional racing teams, this software provides a turn-by-turn breakdown of your run to improve your driving skills. Visit cosworth.com/toolbox-cadillac to download the software.

The CTS-V also includes competition-spec traction and stability controls. Performance Traction Management (PTM) integrates traction and engine control systems for improved and consistent cornering. Enter Track Mode and choose from five driver-selectable levels of control: Wet, Dry, Sport 1, Sport 2 or Race.

During aggressive cornering — or on curvaceous on/off ramps — the electronic Limited-Slip Differential (eLSD) automatically directs power to the rear wheel with the most traction for great control and fast exit speeds. And for an added shot of adrenaline, Launch Control monitors traction activity and allows the engine, transmission and suspension to work together for maximum, full-throttle acceleration off the line, resulting in more consistent 0-60 times.

Manufactured in a high-security factory, V-Series Michelin® Pilot® Super Sport summer-only tires² feature a unique tri-compound design. The outer shoulder is particularly resistant to the wear associated with aggressive cornering. The tread's center ribs are optimized for steering and handling, and the inner shoulder is designed to slice through water, providing grip on the road. These tires also feature R-compound — the "R" stands for racing. Rarely seen on street-vehicle tires, this technology delivers outstanding grip.

¹ Functionality varies by model. Full functionality requires compatible Bluetooth and smartphone, and USB connectivity for some devices. ² Do not use summer-only tires in winter conditions, as it would adversely affect vehicle safety, performance and durability. Use only GM-approved tire and wheel combinations. Unapproved combinations may change the vehicle's performance characteristics. Lower profile tires wear faster. Wheel and tire damage may occur on rough or damaged roads or from surfaces or from curbs, debris or obstacles. This damage is not covered by the GM New-Vehicle Limited Warranty. For important tire and wheel information go to my.cadillac.com/learnabout/tires, or see your dealer.

Perfect execution is the only acceptable standard.

At first thought, you might not consider a track-capable performer to also have the finest amenities. But that's what makes the CTS-V a Cadillac. You'll find craftsmanship, comfort and an array of technologies applied with precise and exquisite vision every time you step inside.

The tailored interior of the CTS-V is refinement pushed tastefully further. Leather and trim options offer timeless style, along with subtle racing aesthetics. For instance, V-carbon-fiber veneers are engineered for beauty and designed with a mirror-matched pattern to accentuate an advanced cockpit.

When it comes to seating, the CTS-V takes a confident place on the podium. Supple, strong and striking, the Semi-Aniline leather seating surfaces and steering wheel available in the V-Series are created using a process that retains the natural beauty of the material, while enhancing their strength and softness.

Synonymous with racing, available RECARO® front seats feature a handcrafted shape that cradles your body during cornering. Along with slip-resistant sueded panels and adjustable bolsters, their design helps take the work out of staying in place during aggressive maneuvers.

Its function is matched by extraordinary comfort. The 20-way front Sport Seats come leather-trimmed with sueded microfiber inserts. They are also heated and ventilated.

Steering Wheel Sueded microfiber rim and shift knob
Wheels (see foldout for more details)
 19" After Midnight painted forged aluminum wheels with summer-only tires²

¹ Vehicles equipped with these linings will experience faster accumulation of brake dust on wheel surfaces and may produce more noise than with standard linings. ² Do not use summer-only tires in winter conditions, as it would adversely affect vehicle safety, performance and durability. Use only GM-approved tire and wheel combinations. Unapproved combinations may change the vehicle's performance characteristics. Lower profile tires wear faster. Wheel and tire damage may occur on rough or damaged roads or from surfaces or from curbs, debris or obstacles. This damage is not covered by the GM New-Vehicle Limited Warranty. For important tire and wheel information go to my.cadillac.com/learnabout/tires, or see your dealer. ³ Go to my.cadillac.com/learn to find out which phones are compatible with the vehicle. ⁴ Cadillac user experience functionality varies by model. Full functionality requires compatible Bluetooth and smartphone. Some devices require USB connectivity. ⁵ Map coverage available in the U.S., Puerto Rico and Canada. ⁶ Not compatible with all devices. ⁷ Vehicle user interface is a product of Apple® and its terms and privacy statements apply. Requires compatible iPhone® and data plan rates apply. Apple CarPlay is a trademark of Apple, Inc. Siri, iPhone and iTunes are trademarks of Apple, Inc., registered in the U.S. and other countries. ⁸ Vehicle user interface is a product of Google and its terms and privacy statements apply. Requires the Android Auto app on Google Play and an Android-compatible smartphone running Android 5.0 Lollipop or higher. Data plan rates apply. Android Auto is a trademark of Google LLC. ⁹ The system wirelessly charges one PMA- or Qi-compatible mobile device. Some phones have built-in wireless charging technology and others require a special adapter/back cover. To check for phone or other device compatibility, see my.cadillac.com/learn or consult your carrier. ¹⁰ Read the vehicle Owner's Manual for important feature limitations and information.

OWNER BENEFITS

Our owners deserve it all. That's why 2019 vehicles are backed by a comprehensive suite of owner benefits. To learn more, visit cadillac.com/ownership/benefits.

AN IMPORTANT NOTE ABOUT ALTERATIONS AND WARRANTIES

Installations or alterations to the original equipment vehicle (or chassis) as distributed by General Motors are not covered by the General Motors New-Vehicle Limited Warranty. The special body company, assembler, equipment installer or upfitter is solely responsible for warranties on the body or equipment and any alterations (or any effect of the alterations) to any of the parts, components, systems or assemblies installed by GM. General Motors is not responsible for the safety or quality of design, features, materials or workmanship of any alterations by such employers.

ENGINES

Cadillac products are equipped with engines produced by GM Powertrain or other suppliers to GM worldwide. The engines in Cadillac products may also be used in other GM makes and models.

ASSEMBLY

Cadillac vehicles and their components are assembled or produced by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Cadillac vehicles with different or differently sourced components than originally scheduled. Since some options may be unavailable when your vehicle is assembled, we suggest you verify that your vehicle includes the equipment you ordered and that, if there were changes, they are acceptable to you.

A NOTE ON CHILD SAFETY

Always use seat belts and the correct child restraint for your child's age and size, even with airbags. Even in vehicles equipped with the Passenger Sensing System, children are safer when properly secured in a rear seat in the appropriate infant, child or booster seat. Never place a rear-facing infant restraint in the front seat of any vehicle equipped with an active frontal airbag. See the Owner's Manual and the child safety seat instructions for more safety information.

TRAILERING AND OFF-ROAD DRIVING INFORMATION

Please go to cadillac.com and carefully review the vehicle Owner's Manual for important safety information about trailering or off-road driving in your vehicle.

IMPORTANT WORDS ABOUT THIS CATALOG

We have tried to make this catalog comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this catalog and other printed materials provided at the dealership or affixed to vehicles are approximations based on design and engineering drawings, prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been updated since the time of printing, please check with your Cadillac dealer for complete details. Cadillac reserves the right to lengthen or shorten the model year for any product for any reason or to start and end model years at different times. Certain vehicle features may lose their usefulness over time due to obsolescence from technological changes. Unless otherwise noted, all claims based on GM Small-Lux SUV segment and latest available competitive information. Excludes other GM vehicles.

FLEET ORDERS

Some standard content may be deleted on fleet orders. See dealer for details.

GMMOBILITY.COM (1-800-323-9935)

GM Mobility offers financial assistance for eligible adaptive equipment to make automotive travel easier for persons with disabilities or special transportation needs. To learn more about special GM Mobility offers, visit gmmobility.com.

NEW-VEHICLE LIMITED WARRANTY

6-YEAR/70,000-MILE TRANSFERABLE POWERTRAIN LIMITED WARRANTY Every 2019 Cadillac comes with a 6-year/70,000-mile (whichever comes first) transferable Powertrain Limited Warranty. 24/7 Roadside Assistance and Courtesy Transportation are also offered for the duration of the Powertrain Limited Warranty. Please see your Cadillac dealer for details.

4-YEAR/50,000-MILE BUMPER-TO-BUMPER LIMITED WARRANTY Cadillac will warrant each 2019 vehicle from bumper to bumper for 4 years/50,000 miles (whichever comes first; see dealer for details), with no deductible, from the original in-service date of the vehicle, for warrantable repairs that are required as a result of defects due to materials and/or workmanship. Cosmetic corrosion resulting from defects is also covered under the Bumper-to-Bumper Limited Warranty. In addition, rust-through corrosion will be covered for 6 years/100,000 miles (whichever comes first; see dealer for details).
